Aaditya Dagar

Full Stack Web Developer

I am a seasoned full-stack web developer with expertise in the MERN stack (MongoDB, Express, React, Node.js) who crafts stunning, high-performance websites that exceed expectations. Whether it is about building a new website or enhancing an existing one, I bring creativity, precision, and dedication to every project.

Work Experience

MERN Stack Developer Intern - Flourishers Edge
April 2023 - June 2023

- Designed and implemented dynamic, responsive front-end UIs using React, enhancing user experience and visual appeal.
- Developed and integrated RESTful APIs and dynamic routes using Express.js and Node.js, ensuring seamless data fetching and real-time display on live websites.
- Collaborated with a team of developers to architect and develop full-stack web applications, leveraging MongoDB and Sanity for robust data management.

Open Source Projects

- Developed a news website, which fetches daily news from API and display them category-wise.
- Designed and developed E-Store for home decor items, where users can login/signup, search and buy items etc
- Made website where patients can find doctors and book appointments.
- Made a website where owner can post daily blogs related to different topics.

Educational Background

SGT University, Gurugram

Bachelor of Technology (B.Tech), CSE
September 2022 – Present

Holy Cross School, Najafgarh New Delhi - 110043

Non-Medical Science Stream with Computer Science

Contact
